

I have had the pleasure of teaching David Mann as a science student for the first 3 years of his high school career. He excelled each year exceeding science expectations.

David is a self-motivated young man who loves to learn. Throughout his life he has been an avid reader who always wants to enhance his knowledge. In Science he was inquisitive and curious. Throughout the school year, David was an active participant in theory and in laboratory experiments. His caring nature and personality allowed him to work well with other students in a team setting. He was respectful of other people's opinions even if they differed from his own.

In addition to all of his schoolwork, David is involved in an extensive amount of extracurricular activities. David's participates in many Church activities. He is the drummer of his youth group's worship band, ushers at Sunday Mass, participates in The Life Teen program, participated in the Rock-A-Thon to raise money for the training of nurses in Haiti and participant in the Edge Core program. . In school, David is a member of Skills USA and has competed in 2 competitions, Opening and Closing Ceremony, and Technical Computer Applications. Since 10th grade David has been a member of the National Honor Society. For the past three years David has been a member of the school's rifle team. Lastly, he has participated in the East Hampton Food Bank Turkey Plunge multiple times in an effort to raise money for East Hampton's Food Bank.

When David is not involved with his community, he is constantly improving his skill as a DJ and guitarist. He is an avid music producer and has been studying music production in his free time. David enjoys boating, waterskiing, knee boarding, riding personal watercrafts, mountain biking and BMX biking. In the winter his favorite sport is skiing.

David has my highest recommendation for admission to your college. He demonstrated excellence in all that he puts his mind to, whether it's designing an experiment, collaborating with his peers or teaching himself new guitar skills. David's endless curiosity, combined with his willingness to take risks, leads me to believe there will be no limits to his achievements in College and his future. I am confident that David will without a doubt be an asset to your School.
